Providing dramatic decorative surface design...

For use in interior and exterior flooring and cladding, providing dramatic decorative surface design.

All of our patterned sheets are available in various finishes, colours, including bright polished finishes and an anodised colour range available in small batches. The only limitation to the colour and finish is the designer or architects imagination.

Available in a wide range of different sheet sizes and thicknesses to suit your application, we can supply bespoke panel sizes and fabricate to your requirements.

PATTERNED ALUMINIUM SHEET

- Five Bar Treadplate
- Triple Grip
- Propeller
- Stucco

The leading supplier of sublimation aluminium...

For many in the architectural and interior design sectors, sublimation products are a totally new concept, although sublimation printing is a familiar term within the printing industry.

So what is sublimation printing? It is a procedure of transferring full colour graphics or photographs onto a wide selection of products. These include metals, ceramics and unsub plastics and glass items all specially pre-coated and therefore sublimation receptive.

Our focus is aluminium and we are the leading supplier of sublimation aluminium in the UK and many worldwide markets, through key distribution customers.

We believe the opportunities for aluminium sublimation offer interior designers in particular, an innovative opportunity to apply bespoke designs and photographs onto aluminium panels for interior décor.

Architectural and surface design...

Aluminium composite sheet is particularly suitable for architectural and surface design applications, due to its high strength, rigidity and durability. This rigidity is achieved by its construction of a polythene core sandwiched between two thin aluminium sheets.

This combination of products and manufacturing process provides a product that can be up to a third of the weight for the same rigidity of more traditional architectural cladding and panelling products, it is clear to see why this has become a firm favourite for decorative and cladding solutions.

All of our composite panels are available pre-finished in polyester paint, offering a five year product guarantee. In addition to standard colours, any colour is available providing you can satisfy a minimum production run. All colours are available in an anti-graffiti finish which is particularly popular for communal access areas.

We can also provide Special finishes, from granite and timber effect to metallic and polished metals. These special finishes offer many diverse opportunities for both the architect and the interior designer.

Our composite panels can be digitally and screen-printed and can also be spray painted, facilitating the opportunity for bespoke surface design.

Pre-anodised panels for interior & exterior applications...

Lorin products are produced by our partner, the world's largest pre-anodiser of aluminium coil, in the United States. Lorin's name has become synonymous with product ingenuity, consistent quality and innovative surface design.

INTERIOR APPLICATIONS

Lorin pre-anodised products are suitable for many interior applications where aesthetics, durability and distinctive interior décor is required. These include ceiling systems, panelling, partitions, framing and work surfaces.

One such innovative product is Alumaplus, which is a stainless steel look alike with one third of the weight of stainless steel. Alumaplus has greater finger print resistance, forms to tighter tolerances and has higher formability than stainless steel. These attributes make Alumaplus an ideal alternative in many architectural and surface design applications, such as kitchens, washrooms, reception areas, point of display and medical display areas.

EXTERIOR APPLICATIONS

Lorin pre-anodised aluminium is not limited to interior design and provides excellent opportunities for cladding, roof finishes and trims and has been used widely in both commercial and domestic architectural and design applications throughout the world.

AVAILABILITY

Blackburns Metals are the UK sole distributor for these unique products and have available from stock, a wide range of colours and finishes from bright to special finishes, including patterned and coloured anodised coil.

Our in-house process centre has the ability to slit and cut to length to the bespoke sizes specified by the customer.

Aluminium, Stainless Steel and non-ferrous alloys...

Blackburns is one of Europe's leading suppliers of Aluminium, Stainless Steel and other semi finished non-ferrous products. Its name is synonymous with high quality and service levels throughout industry, with a reputation for innovative products and supply partnerships.

With a strategically placed network of Sales and Service Centres, Blackburns provides immediate stock availability and local service to a wide range of industry and market sectors, with what is probably the most comprehensive product range and processing facilities in the UK. Local stock is enhanced by a central facility which carries over 10,000 tonnes of material in over 200,000 square feet, all of which is available on a daily basis to each Service Centre throughout the UK.

Focused on customer requirements, a significant investment has been made in processing and fabricating facilities, allowing Blackburns to supply material closer to final form, providing the option of bespoke sizes and finishes previously unavailable, creating a real opportunity of a 'one stop shop'.

Blackburns remains responsive to the constant fluctuation in demand faced by its customers, with the ability to supply most parts of the UK within 24 hours and globally through its Export Department, Blackburns are committed to building long term cost saving relationships with its customers.
